

Tiebreaker Procedures

If there are 2 teams tied for 2nd Place:

If one of the teams won the majority of head to head sets in pool play, that team will get the higher finish.

If the teams split in the pool, there will be a one set playoff to 25 pts. The team who won the pool will officiate.

If there are 2 teams tied for 1st or 3rd:

The team that won the majority of head to head sets in pool play will be the higher finisher. If they split, then the team with the best point differential will be the higher finisher. There will not be a tie breaking set played.

If there are 3 teams tied for 1st place:

The teams will be ranked by point differential. The first ranked team will finish first and referee one set to 25 pts involving the 2nd ranked team and the 3rd ranked team.

If there are 3 teams tied for 2nd place:

The teams will be ranked by point differential. The 1st ranked team will referee 1 set to 25 involving the 2nd ranked team and the 3rd ranked team. The winner of that set will play 1 set to 25 vs. the 1st ranked team with the loser refereeing and being the 4th place team of that pool. The winner of the 2nd set will be the 2nd place finishing team and the loser will be the 3rd Place team of that pool.

If a team will be eliminated from the Championship division, there will be playoff sets played (with the one exception of a two way tie). If they will not be eliminated, point differential will be used to determine finishes.

NOTES:

All point differentials will be for the entire pool, not the head to head match.

A tournament may choose to use point percentage in place of point differential.
